

KS 2026 general: crosstabs

Likely voters (AFWH house estimate). n = 1,301; the poll's margin of error ±3.2 points. Interviews completed October 20, 2026, 10:38 AM ET to October 23, 2026, 10:04 PM ET. Generated from the published release.

[Toplines](#) · [PDF](#) · [CSV](#)

"*" less than 0.5%. "-" zero. "n<50" fewer than 50 respondents: not shown. "†" 50 to 99 respondents: interpret with caution. Totals may not add to 100% due to rounding.

Q1

Q1 How likely are you to vote in the November 3, 2026 general election in [their area]?

Words in brackets were filled in for each person. What each person read was not recorded with their answers.

Base: Likely voters (AFWH house estimate), n = 1,301. Includes those who already voted.

Hispanic of any race. Other: Asian, Pacific Islander, Native American, multiracial and other races. Independents are respondents who did not call themselves a Democrat or a Republican on the party question (they said independent, another party or don't know), whatever their voter-file registration. True independents are independents who answer Neither to the party-lean question. The party recorded on each respondent's voter-file record. Asked only of those who had not yet voted. The word respondents chose to describe their political views. Respondents by their answer on the Senate ballot: whom they voted for, or would vote for if they had not yet voted. Respondents by their answer on the Governor ballot: whom they voted for, or would vote for if they had not yet voted.

"*" less than 0.5%. "-" zero. "n<50" fewer than 50 respondents: not shown. "†" 50 to 99 respondents: interpret with caution. Totals may not add to 100% due to rounding.

Q2/Q3 Senate ballot choice

Q2 Who did you vote for in this year's general election for U.S. Senate? (Asked only of respondents who answered Q1 “Already voted”)

Candidate order: randomized for each respondent (Kansas: rotates by county divisions (precinct for some district offices) on the Kansas ballot; K.S.A. 25-610)

Q3 If the election for U.S. Senate were held today, who would you vote for? (Asked only of respondents who were asked Q1 and did not answer “Already voted”)

Candidate order: randomized for each respondent (Kansas: rotates by county divisions (precinct for some district offices) on the Kansas ballot; K.S.A. 25-610)

Base: Likely voters (AFWH house estimate), n = 1,301. Includes those who already voted. Leaners are not included: the undecided were asked a follow-up, shown in its own table (Q4).

Hispanic of any race. Other: Asian, Pacific Islander, Native American, multiracial and other races. Independents are respondents who did not call themselves a Democrat or a Republican on the party question (they said independent, another party or don't know), whatever their voter-file registration. True independents are independents who answer Neither to the party-lean question. The party recorded on each respondent's voter-file record. Asked only of those who had not yet voted. The word respondents chose to describe their political views. Respondents by their answer on the Senate ballot: whom they voted for, or would vote for if they had not yet voted. Respondents by their answer on the Governor ballot: whom they voted for, or would vote for if they had not yet voted.

"*" less than 0.5%. "-" zero. "n<50" fewer than 50 respondents: not shown. "†" 50 to 99 respondents: interpret with caution. Totals may not add to 100% due to rounding.

Q6/Q7 Governor ballot choice

Q6 Who did you vote for in this year's general election for Governor? (Asked only of respondents who answered Q1 “Already voted”)

Candidate order: randomized for each respondent (Kansas: rotates by county divisions (precinct for some district offices) on the Kansas ballot; K.S.A. 25-610)

Q7 If the election for Governor were held today, who would you vote for? (Asked only of respondents who were asked Q1 and did not answer “Already voted”)

Candidate order: randomized for each respondent (Kansas: rotates by county divisions (precinct for some district offices) on the Kansas ballot; K.S.A. 25-610)

Base: Likely voters (AFWH house estimate), n = 1,301. Includes those who already voted. Leaners are not included: the undecided were asked a follow-up, shown in its own table (Q8).

Hispanic of any race. Other: Asian, Pacific Islander, Native American, multiracial and other races. Independents are respondents who did not call themselves a Democrat or a Republican on the party question (they said independent, another party or don't know), whatever their voter-file registration. True independents are independents who answer Neither to the party-lean question. The party recorded on each respondent's voter-file record. Asked only of those who had not yet voted. The word respondents chose to describe their political views. Respondents by their answer on the Senate ballot: whom they voted for, or would vote for if they had not yet voted. Respondents by their answer on the Governor ballot: whom they voted for, or would vote for if they had not yet voted.

"*" less than 0.5%. "-" zero. "n<50" fewer than 50 respondents: not shown. "†" 50 to 99 respondents: interpret with caution. Totals may not add to 100% due to rounding.

Hispanic of any race. Other: Asian, Pacific Islander, Native American, multiracial and other races. Independents are respondents who did not call themselves a Democrat or a Republican on the party question (they said independent, another party or don't know), whatever their voter-file registration. True independents are independents who answer Neither to the party-lean question. The party recorded on each respondent's voter-file record. Asked only of those who had not yet voted. The word respondents chose to describe their political views. Respondents by their answer on the Senate ballot: whom they voted for, or would vote for if they had not yet voted. Respondents by their answer on the Governor ballot: whom they voted for, or would vote for if they had not yet voted.

"*" less than 0.5%. "-" zero. "n<50" fewer than 50 respondents: not shown. "†" 50 to 99 respondents: interpret with caution. Totals may not add to 100% due to rounding.

Hispanic of any race. Other: Asian, Pacific Islander, Native American, multiracial and other races. Independents are respondents who did not call themselves a Democrat or a Republican on the party question (they said independent, another party or don't know), whatever their voter-file registration. True independents are independents who answer Neither to the party-lean question. The party recorded on each respondent's voter-file record. Asked only of those who had not yet voted. The word respondents chose to describe their political views. Respondents by their answer on the Senate ballot: whom they voted for, or would vote for if they had not yet voted. Respondents by their answer on the Governor ballot: whom they voted for, or would vote for if they had not yet voted.

"*" less than 0.5%. "-" zero. "n<50" fewer than 50 respondents: not shown. "†" 50 to 99 respondents: interpret with caution. Totals may not add to 100% due to rounding.

Q37

Q37 Would you call yourself a strong Democrat or a not very strong Democrat? (Asked only of respondents who answered Q36 “Democrat”)

Base: Likely voters (AFWH house estimate), n = 455. Includes those who already voted.

Hispanic of any race. Other: Asian, Pacific Islander, Native American, multiracial and other races. Independents are respondents who did not call themselves a Democrat or a Republican on the party question (they said independent, another party or don't know), whatever their voter-file registration. True independents are independents who answer Neither to the party-lean question. The party recorded on each respondent's voter-file record. Asked only of those who had not yet voted. The word respondents chose to describe their political views. Respondents by their answer on the Senate ballot: whom they voted for, or would vote for if they had not yet voted. Respondents by their answer on the Governor ballot: whom they voted for, or would vote for if they had not yet voted.

"*" less than 0.5%. "-" zero. "n<50" fewer than 50 respondents: not shown. "†" 50 to 99 respondents: interpret with caution. Totals may not add to 100% due to rounding.

Q42

Q42 Which of these best describes your household's total income in 2025, before taxes?

Base: Likely voters (AFWH house estimate), n = 1,301. Includes those who already voted.

Method

Sponsor and conductor

Sponsored by A Fight Worth Having (super PAC, FEC C00933085); conducted by RedBox Research, AFWH's polling unit.

Population

Likely voters (AFWH house estimate) in the declared poll frame (KS); weighted to the November 3, 2026 general electorate as the state's 2026 turnout verdict, set in advance, defines it: age from the turnout model's predicted 2026 electorate, trained only on elections since 2016, the other dimensions from the last comparable electorate. Race is weighted to the likely electorate's composition by each voter's recorded race, else its verified surname-and-geography estimate, in place of the 2022 base's recorded-race shares the verdict carries. The AFWH house estimate: the average of the weighting recipes held to the 2024 vote that passed our checks for this poll (recalled-vote recipe, recalled-vote recipe plus turnout groups, recalled vote among verified 2024 voters and recalled vote among verified 2024 voters plus turnout groups), each on our likely-voter model's turnout step, raked to the poll's electorate targets and to the certified 2024 presidential result through recalled 2024 vote and the Census college share of the geography's registered citizens.

Sample frame and coverage

A probability sample: every voter was drawn at random, with a recorded seed, from the voter-file universe named in the disclosure. No response was generated by AI (no synthetic respondents were used). Voters were drawn from the AFWH voter file, built from the Kansas official state voter registration file dated July 6, 2026 (received July 25, 2026), for 260,627 drawn voters. Telephone numbers: of the 97,888 voters sent an invitation or called, 44,976 at a number on the official voter file; 31,586 at a number both the official voter file and L2 held; 21,326 at numbers L2 appended to the voter record (order 132877). 97,888 of the 260,627 drawn voters (37.6%) had a textable number and were sent an invitation; the other 162,739 could not be reached by text and are counted as not attempted (AAPOR 3.23).

Mode and languages

Text message invitation to a self-administered web survey. Languages: English.

Field dates

First invitation October 20, 2026, 10:22 AM ET; first completed interview October 20, 2026, 10:38 AM ET; last completed interview October 23, 2026, 10:04 PM ET.

Completed interviews

Completed interviews by frame: KS 2026 general 1,301. By mode: web 1,301.

Weighting

a weighted average of several raking recipes' weights to party registration (Democratic 29.1%, Libertarian 0.7%, no party 15.4%, other parties 0.0%, Republican 54.7%); gender (women 52.7%, men 47.2%, gender not recorded 0.0%); age group (18-29 7.7%, 30-44 18.6%, 45-54 15.1%, 55-64 18.7%, 65+ 39.9%); 2024 presidential vote (recalled) (Harris 38.5%, did not vote or voted for someone else 7.9%, Trump 53.6%); congressional district (KS-01 23.8%, KS-02 23.3%, KS-03 30.1%, KS-04 22.8%); education (four-year college degree) (college degree 39.2%, no college degree 59.1%, not recorded 1.7%); race and ethnicity (voter-file model) (Asian or Pacific Islander 1.5%, Black 5.1%, Hispanic 5.3%, other races 2.7%, White 85.4%), from the 2026 electorate targets of the state's 2026 turnout verdict, set in advance; base weights are the share of the likely electorate in each congressional district, divided among the district's respondents in proportion to their likelihood of voting.

How the weights are combined

Each respondent's weight combines two families of weighting recipes anchored to the 2024 presidential vote: one to the certified result, one to the 2024 vote of respondents the voter file shows voted, each named candidate held to its certified share. Within a family, the recipes that pass the partisan checks are averaged, each recipe's weights scaled to a mean of 1 first. Each family counts in proportion to how often its average fits voter-file facts no recipe weights to best (2020 and 2022 turnout, registration year and county, and where the state's file of returned ballots is held, the early vote by party) over 500 resamples of respondents: certified 2024 recall (2 recipes), 31.4%; corrected 2024 recall of file-validated 2024 voters (2 recipes), 68.6%. Each recipe rakes the likely voters to its targets, its weights trimmed at the 1st and 99th percentiles; recipes off the electorate's party mix by more than 3 points or the certified 2024 result by more than 5 were left out. Recipes without a 2024 vote anchor were computed as sensitivities only. A question asked of a random part of the sample is read on the same weights of the respondents who answered it. Weight trimming: Each recipe in the estimate raked the design weights to its targets with no bound on the adjustment, then trimmed its final weights at their 1st and 99th percentiles and raked them again; averaging the recipes trimmed no weight.

Likely voters

No question screened respondents out of the interview. Each respondent's voter-file turnout score was updated by their answer to the vote-intention question (Q14), with an odds ratio of 2.42 between the lowest and highest answers. Respondents who said they had already voted (Q1) counted as certain to vote; a missing answer kept the file score; anyone else whose file score was zero got no weight. Each respondent's weight was multiplied by the updated score before raking to the targets. Each person counts by their chance of voting: the turnout score our voter-file model gives them, adjusted by how likely they said they are to vote.

Turnout model

Not recorded in the release disclosure.

Margin of error

n = 1,301 completed interviews; 97,888 sampled voters were sent a text invitation; margin of error ± 3.2 percentage points at 95% confidence including a design effect of 1.41. The margin of error on the gap between two candidates is roughly twice the poll's margin of error; each race's own figure is given in the fine print with its result. Each column's margin of error in the tables is $1.96 \times \sqrt{(0.25 \div \text{effective } n)} \times 100$: the same formula on that column's own respondents and weights, its design effect included.

Composition of the sample

Unweighted and weighted shares of the respondents, with their number, in the composition table.

Response rate

Standard: AAPOR Standard Definitions, 10th edition (2023), list samples: section 1.3 (phone surveys of named persons) and section 1.6 (SMS surveys of named persons). Final dispositions of the 260,627 drawn cases: 1.1 Complete interview: 1,301; 2.1133 Replied STOP to the invitation: 6,888; 2.12 Break-off: started the survey (web link or phone) and stopped before completing it: 679; 3.20 Invitation delivered, no response: 86,233; 3.219 Invitation not delivered: 2,286; 3.23 Not attempted: no invitation sent and no call dialed: 162,739; 3.9 Invitation sent, no delivery status returned: 501; Outcome rates: RR1 0.5%; RR3 0.5%; COOP1 14.7%; REF1 2.9%; CON1 3.4%. 97,888 text invitations sent, 0 calls dialed. Text message to the web survey: 97,888 cases attempted. RR1 1.3%; RR3 1.3%; COOP1 14.7%; REF1 7.7%; CON1 9.1%. Each mode counts only the people it tried to reach and only the interviews completed in that mode: a voter texted who then finished by phone is a text non-complete and a phone complete. Each mode's RR3 uses the release's e. Each voter's final disposition is the most informative outcome across every text and call (AAPOR Standard Definitions, 10th edition, pp. 9 and 13): a complete in either mode, then a screen-out, then a refusal or break-off, then the most informative unreached outcome. e = 1.0000: proportional allocation (the default of AAPOR Survey Outcome Rate Calculator 5.1 (2023),

List Samples sheet) over the 8,868 cases whose eligibility was settled by contact (8,868 eligible, 0 screened out). Duplicate listings are left out because the frame check removed them from every drawn case. The questionnaire has no eligibility screener, and the Standard Definitions treat an unreached named-list case as eligible when none is required.

Quality checks

Each invited voter received a unique survey link; a link yields at most one interview. Quality flags recorded: 782 duplicate submissions, 3 interviews completed implausibly fast. Flags are measured, not used to drop cases: all 1,301 interviews completed by the status date are in the weighted estimates.

AI use

(a) Task performed by AI: none in data collection; no AI interviewer or chatbot was used (Text message invitation to a self-administered web survey). AI in processing: No language model coded, weighted or wrote any published result; every published number and sentence is produced by deterministic code from the recorded responses. (b) Human oversight or validation: not applicable; no AI output enters the data or the published results.

Limitations

The margin of error (3.2 points at 95% confidence, including the design effect) describes sampling error for a result near 50% among all respondents. Results for subgroups carry larger margins, and question wording, coverage and nonresponse can also affect results. The margin of error on the gap between two candidates is roughly twice the poll's margin of error; each race's own figure is given in the fine print with its result. The sponsor is a political committee (a super PAC). Readers should weigh results with that sponsorship in mind. Respondents could be reached only through a telephone number matched to their voter record; voters without a usable number were outside the sample frame. Respondents answered online; people unable or unwilling to complete a web survey are represented only through weighting. 30 respondents had no recorded age group and were not adjusted on that variable. 68 respondents had no recorded race and ethnicity (voter-file model) and were not adjusted on that variable. 5 estimates rest on fewer than 50 respondents and are not shown. 4 estimates rest on 50 to 99 respondents and are shown marked “interpret with caution.”

Questionnaire

Each table prints its question's exact wording; the full questionnaire, in order, is part of the release disclosure.

Standard

AAPOR Code of Professional Ethics and Practices, Section III.A. Generated by code (pollster.public-crosstabs.v1) from the stored final weighting run, its crosstabs and its release; nothing in it was typed by hand.
